

From Friction to Seamless Automation

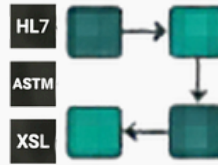

Automated Clinical Controls

Minimizes human error via automated reflex testing, saving time on printing, and QC freeze rules.

Rapid Deployment

Custom front-ends and direct data protocols can be implemented within weeks.

Native Interfacing

Replaces error-prone middleware with direct instrument data feeds using HL7, ASTM, and XSL.

Unified Architecture

Unites specialized departments from every discipline under one flexible platform.

Proven Operational Impact, ROI, and Scalability

6-8

Significant Labor Savings

Sherman Abrams Laboratory saved **6-8** full-time employees annually through automated workflows and direct acceptance of diverse instrument data feeds - **within weeks**.

21%

High-Volume Scalability

Enabled for **Sonata Quest**, surpassing **30,000** daily samples.
Boosted **Shamir Medical Center** with a **22%** increase (21 Million+ tests annually)
