

LabMD's web portal and mobile app provide real-time access to lab results, enabling medical professionals to review and respond to critical information whether they're in the office, at home, or on the move.

Physicians often work beyond the confines of their office, requiring secure access to lab data from any location with a stable and reliable connection.

ENHANCED MEDICAL EFFICIENCY

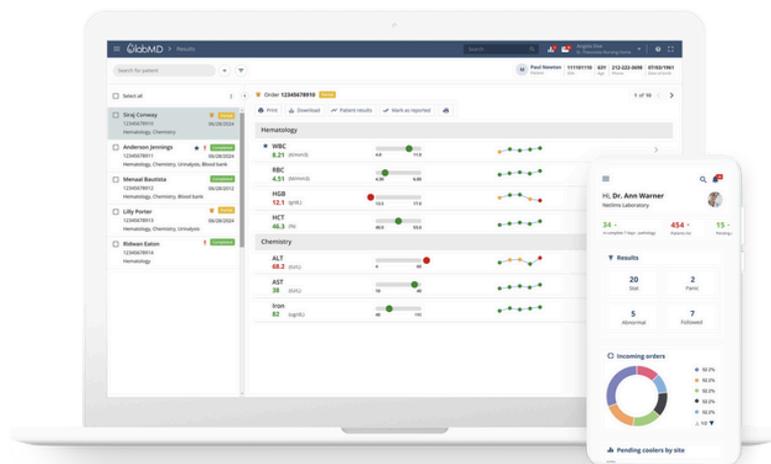

LabMD is a personalized physician portal enabling real-time lab connectivity that seamlessly works with your LabOS LIS to streamline communication and optimize lab testing processes.

LabMD's real-time alerts provide physicians with complete control over their patients' lab testing process while enhancing communication with laboratories. With LabMD, physicians and labs can reduce errors, save time, and enhance overall efficiency.

MULTI-DEVICE WORKFLOWS ON EVERY DEVICE

LabMD facilitates effortless patient management by integrating results from point-of-care (POC) devices and all departments into a single, unified dashboard. This seamless connectivity enhances communication between laboratories and healthcare providers, ensuring efficient, coordinated workflows across every device - from desktop computers to tablets. With real-time data access and an intuitive interface, LabMD drives better decision-making and improves patient outcomes.

GUIDED SAMPLE COLLECTION

LabMD empowers physicians to effectively guide and support phlebotomists with clear, step-by-step instructions for collecting and labeling samples, reducing errors, and ensuring accurate time-stamping via barcode scanning.

PROACTIVE PATIENT MANAGEMENT

With LabMD, clinicians gain tools to visualize cumulative data trends, enabling early intervention and improving long-term patient outcomes. Interactive dashboards and predictive analytics help identify anomalies faster, supporting proactive decision-making. For example, LabMD's intelligent alerts prevent repeat testing by flagging "Recently Ordered" tests and monitoring patient history trends.

STAY AHEAD OF THE CURVE - BOOK YOUR DEMO

DATA-DRIVEN DECISION-MAKING

LabMD highlights abnormalities based on patient-specific history and predefined thresholds, helping clinicians make informed, timely decisions.

PATIENT-CENTRIC

LabMD centralizes patient management by integrating results from point-of-care (POC) devices and all departments into an easy-to-use dashboard.

MULTI-DEVICE ACCESS

LabMD is accessible from all devices at the office and home, ensuring clear communication between laboratories and healthcare providers for smoother workflows.

INTUITIVE USER EXPERIENCE

LabMD's intuitive design simplifies routine tasks such as reviewing test histories, ordering lab tests, and scheduling follow-ups, saving valuable time for medical professionals.

REAL-TIME LAB DATA

Access real-time data, including patient demographics, cumulative test results, insurance details, medical notes, and diagnoses. LabMD alerts clinicians to trends and abnormal results.

COMPREHENSIVE TEST ORDERING

Order a full range of lab tests in a single order, with add-ons utilizing existing samples. Features like stat designation, comment fields, and scheduled follow-ups enhance flexibility and precision.
